Profile

MSc Computer Science graduate from Aarhus University with a strong foundation in software development, algorithms, databases, distributed systems, machine learning, and XR/visual computing. Seeking junior software development roles focused on structured problem solving, maintainable code, and technical growth.

Technical Skills

Programming

- Java
- Python
- C#
- JavaScript / HTML / CSS
- SQL / MySQL
- C
- Scala
- ARM Assembly, x86

Tools and Technologies

- Unity
- Git
- Linux
- REST APIs
- Databases
- Machine learning workflows
- XR / AR / VR systems
- Computer graphics

Academic Projects

Master's Thesis – GRIP-TK: XR Interaction Toolkit

- Co-developed a Unity-based node-graph toolkit for authoring and evaluating XR interaction techniques, including experiment logic, logging, and visualization flow.
- Worked on toolkit architecture, interaction technique definitions, evaluation design, qualitative analysis, and extensibility concepts.

Bachelor Project – BlobbyKelp Data Visualization

- Developed a prototype for organic data visualization using blobby shapes to represent grouped data points on maps and 2D graphs.
- Worked with graph routing, minimum spanning trees, collision handling, convex/non-convex hulls, and spline-based shape smoothing.

Education

Aarhus University
MSc Computer Science

2024 – 2026

Aarhus University
BSc Computer Science

2021 – 2024

Languages

Romanian: Native

Danish: Proficient

English: Proficient
