Profile

MSc Computer Science graduate from Aarhus University with a main academic focus on XR systems and human-computer interaction. My Master's work centered on how users interact with immersive environments, including prototyping, evaluation setup, and interaction-tool design in Unity. I also have an academic interest in intelligent systems, supported by coursework in machine learning, data mining, and deep learning for visual recognition. Alongside my studies, I have been building web development fundamentals through self-learning. I am looking for an entry-level technical role where I can contribute to implementation work, learn from experienced developers, and build stronger engineering habits.

Technical Skills

More familiar with

- C#
- Unity
- XR / AR / VR prototypes
- Java
- Python
- Git
- SQL / MySQL

Basic exposure to

- JavaScript / HTML / CSS
- REST APIs
- Computer graphics concepts
- Machine learning workflows
- Deep learning concepts
- Data mining concepts
- Distributed systems concepts
- Algorithms and data structures
- Cloud / P2P computing concepts
- C
- Scala
- ARM Assembly and x86

Academic Projects

Master's Thesis – GRIP-TK: XR Interaction Toolkit

- Co-developed a Unity-based node-graph toolkit for creating and testing XR interaction techniques.
- Worked on experiment setup, interaction definitions, logging, visualization flow, and general toolkit structure.
- Focused on user interaction in immersive environments, with emphasis on prototyping and evaluation support.

Bachelor's Thesis – BlobbyKelp Data Visualization

- Developed a prototype for visualizing grouped data points using organic blobby shapes on maps and 2D graphs.
- Worked with graph routing, minimum spanning trees, collision handling, hull generation, and spline-based shape smoothing.
- Applied visualization techniques to explore alternative ways of representing grouped spatial data.

Education

Aarhus University
MSc Computer Science

2024 – 2026

Aarhus University
BSc Computer Science

2021 – 2024

Languages

Romanian: Native

Danish: Proficient

English: Proficient
